   Description: A hospital management System built with raw PHP. Features: Appointment Management, Patient Management, Test report, Prescription, Room, and Medicine control. etc.
   Email: kamal@yahoo.com
   Pass: 123
   - **for details go to:** https://hospital.wdpf54.tech

2. **Title:** Hospital Management System (Laravel)

   - **Description:** The Laravel-based Hospital Management System is a robust and efficient software solution designed to streamline hospital operations. It seamlessly manages.
     patient information, appointments, tests, and administrative tools. This system enhances.
     healthcare service delivery, ensuring accuracy, security, and accessibility for healthcare.
     professionals, staff, and patients.
     Email: galib@gmail.com
     Pass: 1234
   - **for details go to:** https://wdpf54.tech/hms https://wdpf54.tech/hms/login

3. **Title:** WordPress Theme Development

   - **Description:** This WordPress theme development project is a dynamic and versatile solution, featuring custom post types that allow for easy content organization. With tailored widgets, the theme incorporates social media plugins, providing seamless integration for displaying icons and fostering enhanced online presence. Its fully dynamic design ensures adaptability to various content types, offering users a personalized and interactive experience. This theme is a comprehensive and user-friendly option, combining customizability with a visually appealing layout for a standout website.
   - **for details go to:** https://wdpf54.tech/theme_dev

4. **Title:** WordPress WooCommerce Project

   - **Description:** This WordPress WooCommerce project presents a feature-rich e-commerce solution, incorporating an intuitive "Add to Cart" feature. The checkout process is streamlined, offering customers a seamless journey from product selection to order placement. The theme emphasizes user convenience through an efficient and intuitive design. Alongside WooCommerce's secure transaction platform, the addition of a Wishlist functionality enhances the overall shopping experience. It's an optimal choice for businesses aiming to create a responsive and comprehensive online store.
   - **for details go to:** https://wdpf54.tech/woocommerce

5. **Title:** Restaurant Management System

   Description: This React, CodeIgniter and PHP powered Restaurant Management project is a modern and efficient system designed for optimal performance. Featuring a customized POS system, it seamlessly caters to breakfast, lunch, and dinner services. The user-friendly cart system enhances the ordering experience, while integrated coupons provide customers with attractive discounts. The project's responsive design and intuitive checkout process ensure a smooth and enjoyable journey for users. With a robust backend built on CodeIgniter, restaurant owners gain full control over front-end elements, including menu items and coupon management, facilitating easy updates and modifications. This project represents a harmonious blend of cutting-edge frontend technology and a reliable backend API, offering a sophisticated solution for restaurant management. Email: galib@gmail.com
   Pass: 12345
   - **for details go to:** https://github.com/galib3333/gourmet_react.git
     https://gourmetgrove.netlify.app

6. **Title:** PSD to Bootstrap/HTML

   - **Description:** Transformed creative vision into a seamless digital reality with PSD to Bootstrap/HTML/CSS conversion. I converted Photoshop designs into responsive and pixel-perfect Bootstrap templates, ensuring a flawless user experience across devices. **for details go to:** https://psd3to3bootstrap.netlify.app/
